Tianyu Xia

Zhejiang University | (+86) 15190082498 | E-mail: tyxia@zju.edu.cn

EDUCATION

Zhejiang University *Hangzhou, China*

B.Eng. in Opto-Electronics Science and Engineering *Sep. 2021 – Jun. 2025 (Expected)*

- **Last year GPA: 3.82/4.00,** Overall GPA: 3.67/4.00
- Courses: Physical Optics: 3.90/4.00, Applied Optics: 3.90/4.00, Applied OptoelectronicsLab: 3.90/4.00

RESEARCH EXPERIENCE

Boston University (Dept. of Electrical & Computer Engineering) **Advisor: Prof. Jixin Cheng**

Extracting MIP signals from water background using PLS for lipid synthesis study *Jul. 2024 - Aug. 2024*

- Developed a novel background removal algorithm tailored for hyperspectral data to effectively isolate signal peaks from the background noise
- Implemented the method to MIP data, successfully extracting peaks while preserving the spatial and intensity characteristics of the original signals
- Demonstrated that the new algorithm outperformed traditional subtraction method in both accuracy and robustness, providing a versatile solution for background removal in hyperspectral imaging data
- Detected fatty acid unsaturation in cancer cells via MIP image process

Zhejiang University (College of Optical Science and Engineering) **Advisor: Prof. Huafeng Liu**

Deep learning framework for enhancing TOF performance of PET detector *Mar. 2024 - Present*

- Gained expertise in deep learning-based Positron Emission Tomography (PET) detector timing algorithm combining Transformer and Convolutional Neural Networks (CNNs)
- Transformed original regression network to a classification network to enhance Coincidence Time Resolution (CTR)
- Leveraged a Linux-based simulation system to generate comprehensive training data for machine learning

Zhejiang University (College of Optical Science and Engineering)

- Developed an eye-tracking interaction system based on Conv-LSTM using DVS data
- Created a program of image processing for silicon wafer counting based on Matlab
- Contributed to PCB circuit design and programming
- Designed optical lenses based on Zemax

PUBLICATION

- Xinyan Teng, **Tianyu Xia**, Jiaze Yin, Guangrui Ding, Jianpeng Ao, Mingsheng Li, Haonan Lin, Daniela Mateia, Hongjian He*, Ji-Xin Cheng*, "Measuring Fatty Acid Unsaturation in Cancer Cells via Mid-Infrared Photothermal Imaging." *(Manuscript in Preparation)*

LEADERSHIP & VOLUNTEER EXPERIENCE

- Served as the main person in charge of the community of Drama Society
- Undertook volunteer activities for more than 20 hours
- Participated in social practices about Traditional Theatre and Local Diets

PERSONAL ABILITY

- Programming: Advanced in Matlab, PyTorch, C++
- Language skills: TOEFL 103 (R:26 L:28 S:21 W:28)
- Personality traits: Positive with bright mind, A stable personality, A high sense of responsibility
